

Christina Landon

*Naval Surface Warfare Center, Crane Division
(NSWC Crane)*

As a member of the Naval Sea Systems Command (NAVSEA) civilian workforce, Tina Landon has supported microelectronics and circuit card assembly projects for several years. Her career began with assessing electronics concerns in NSWC Crane's Failure Analysis Lab and progressed to roles in QA and in leadership within the Printed Circuit Technology Branch. Operating at the confluence of systems engineering, materials engineering, and modern manufacturing technology, Christina engages with elements of the Department of Defense to support electronics at all phases of the acquisition life cycle.
